Planning and running your computer center calls for the time and know-how of many specialists--both those on your staff and those available through your vendors.

To your roster of sophisticated vendors, you can now add our organization.

DATAMATION SYSTEMS, INC. is a new kind of service organization designed by men like yourself to help you cope with the many varied demands on your data processing staff.

Our new and unique service will help you:

1. Plan and control your operation to maximize efficiency.
2. Improve the flow of work through your operation.
3. Help other departments whom you serve to cope with their need for efficient handling of input and output media.

DATAMATION SYSTEMS, INC. is, in effect, a "department store" of data processing accessories and supplies and a source of peripheral systems products and ideas to help you implement and tighten your procedures.

We offer a specialized service that can save you time and money. We help you plan your information storage, processing, and retrieval systems, protection and preservation systems, tape library maintenance systems, card-handling and document file systems, and related clerical operations.

We are a marketing and systems sales organization, not merely consultants, for the payoff is in the implementation! We help you select the equipment and supplies that best serve your specific systems requirements . . . and help you secure the top of the line, value-engineered brands at competitive prices.

There is no obligation for our systems suggestions. It is our privilege to serve you. Our services are compensated by your decision, if you deem it wise, to secure specific equipment and supplies through us.

Write or call for a preliminary discussion or survey; no charge, of course. Tel.: 201 836 4994.

Sincerely yours,

DATAMATION SYSTEMS, INC.

Morton M. Raymond
